

ABSTRACT OF THE DISCLOSURE  
MAMMALIAN CYTOKINE-LIKE POLYPEPTIDE-10

5       A mammalian cytokine-like polypeptide, called Mammalian Cytokine-like  
polypeptide - 10, (Zcyto10), polynucleotides encoding the same, antibodies which specifically  
bind to the polypeptide, and anti-idiotypic antibodies which bind to the antibodies. Zcyto10 is  
useful for promoting the healing of wounds and for stimulating the proliferation of platelets.
